COVER IMAGE:

Occupying roughly 11% of South Africa's land surface, the Western Cape is home to more than 50% of the country's biodiversity. Kogelberg Nature Reserve lies in the heart of the Fynbos Biome. Photo by Scott N. Ramsay.

The Botanical Society of South Africa is a Non-Governmental Organisation whose mission is to win the hearts, minds and material support of individuals and organisations, wherever they may be, for the conservation, cultivation, study and wise use of the indigenous flora and vegetation of southern Africa.
