COVER

Cecilia Williams comes from a long line of flower sellers who have been in the trade for several generations. The iconic Adderley Street flower market is one of few places in the inner city of Cape Town where black business people have operated independently for over a century. Being largely excluded from careers in botany and horticulture during apartheid, flower farming and selling were occupations in which 'non-white' people successfully made a living by working with flowers. See page 132. Photo: Melanie Eva Boehi.

The Botanical Society of South Africa is a Non-Governmental Organization whose mission is to win the hearts, minds and material support of individuals and organizations, wherever they may be, for the conservation, cultivation, study and wise use of the indigenous flora and vegetation of southern Africa.

Know, grow and protect South Africa's indigenous flora
